WE SPEAK SOUND

arts@und

ARTSOUND

...THE ART OF SOUND

SINCE THE 1990S, OUR PASSION, OUR RELIGION: DESIGNING LOUDSPEAKERS AND EVERYTHING THAT GOES WITH THEM, COMBINING QUALITY AND AFFORDABILITY.

BELGIAN

ArtSound is Belgian, and we are proud of that. With an eye for detail and expert knowledge, we design products and services tailored to your situation. At home, outdoors, at work, in the factory... it goes from heart to hard without distortion.

SIMPLE

ArtSound is simple, in the best sense of the word. Never loud, always refined – less is more. Whether customised or not, we prioritise ease of use in every development, both for installation and operation.

LISTENING

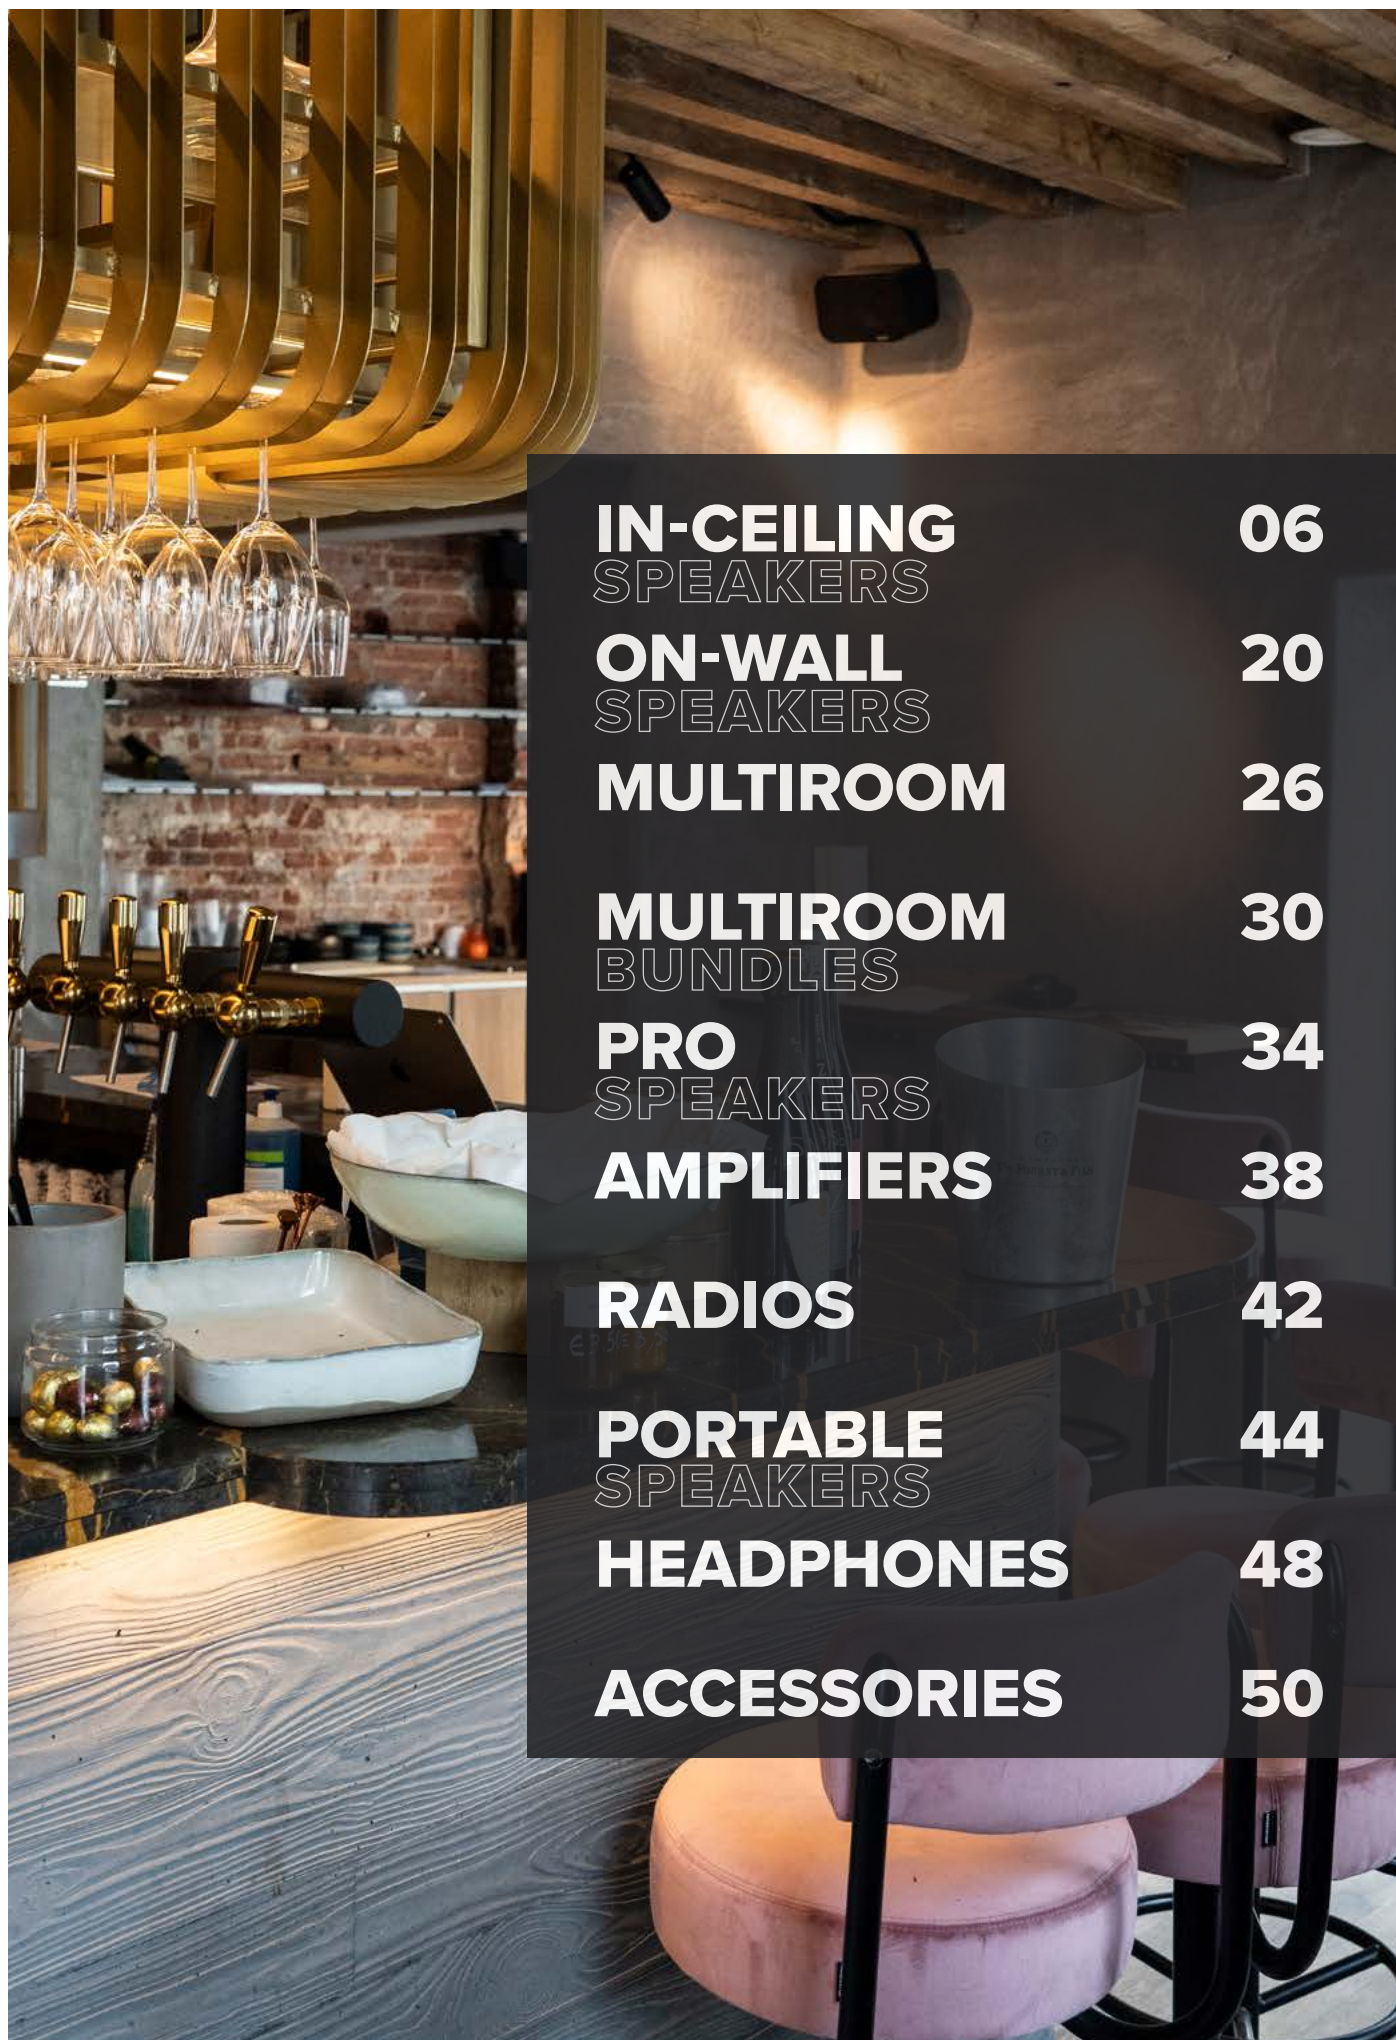

At ArtSound, we listen first. To hear what you have to say, what your expectations are. We look at the space. Only then can we propose a solution that really suits you and that musically enhances your private and/or professional life.

ACCESSIBLE

ArtSound is accessible in every way. We think along with you, are transparent and affordable: with us, you don't pay for expensive marketing. Our range offers solutions for almost every situation – from in-ceiling and surface-mounted to waterproof, active and passive. And if the right solution doesn't exist yet? Then we'll develop it together.

Our mission: your music, anytime, anywhere.

ArtSound ensures that you can take your music with you everywhere: in your pocket, on your smartphone, via an app and via the speakers we design for you. You stream where and when you want. We make sure it sounds perfect. We provide the right sound for your life. ArtSound.

IN-CEILING SPEAKERS

INVISIBLE DESIGN. MAXIMUM IMPACT

It's an unwritten rule that hi-fi enthusiasts are only too keen to endorse: loudspeakers should be heard and not seen. Whilst giving clear and faithful sound reproduction without distortion, they should do so without stepping into the limelight themselves. It's with this philosophy in mind that ArtSound designs its speakers. The discrete design and advanced technology serve just one purpose: listening enjoyment.

INTIMI

ULTIMATE SEDUCTION

Intimi is our ultimate speaker range. Every detail is crafted with premium components - from titanium-coated drivers and robust crossovers to a sleek housing and gold-plated terminals. Nothing is left to chance. This is where our expertise and passion come together.

paintable

- ultra thin frame
- swivel tweeter in an acoustic shell
- manual treble control
- grille with magnetic fixing
- paintable metal grille
- mounting templates included
- optional flush mount or acoustic kit

RO2040

power	20 - 120 W
Ø x d	17,5 x 8 cm

RE2080

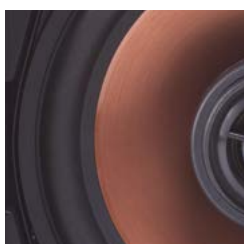

power	40 - 160 W
h x w x d	36 x 25,5 x 10 cm
installation cutout	33,5 x 23 cm
optional	acoustic kit
	flush mount kit
units / box	2

HAPPI

SPLASHPROOF. BEST VALUE.

Happi is a Finnish word meaning “open” and “oxygen.” Its sleek design features a wafer-thin chassis and discreet built-in magnets behind the grille. A dedicated crossover, woofer and swivel tweeter all deliver a pure, warm sound. Robust inside and out, Happi easily withstands the occasional splash of water.

- swivel tweeter
- aluminium woofer for higher output
- ultra thin frame
- grille with magnetic fixing
- paintable grille
- mounting templates included
- water-resistant aluminium grille
- optional:
 - acoustic mount kit
 - black grille

HPRO30

power	20 - 40 W
Ø x d	11,8 x 8,4 cm
installation cutout	Ø 9,9 cm

IN-WALL SOLUTIONS

Precast concrete kit

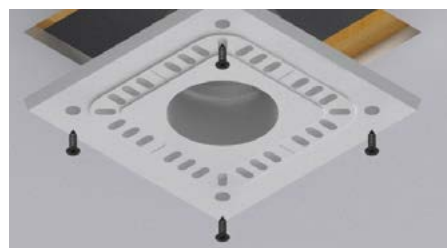

The CKIT allows you to create an acoustic space in vaults or concrete structures. The 'smart' solution for acoustically unfriendly surroundings. This kit is installed before you cast the concrete and guarantees a smooth sound in any concrete structure. The CKIT is always packed per unit.

Acoustic kit

These kits, made from water-repellent MDF, are always packed per unit. These are easy to install and acoustic-absorbent. The kits help eliminate annoying resonations which may occur at the rear of the loudspeaker when you install it in a wall or ceiling.

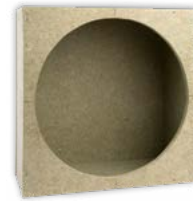

Flush Mount Kit

This kit ensures that the **Intiimi** loudspeaker's design grille is exactly level with the surface of your ceiling. The flush mount kits were designed with the idea for easy installation and unobtrusiveness. Available for all Intiimi models.

Precast concrete kit	Ø x d	installation cutout

ON-WALL SPEAKERS

EASY ON THE EYES. GREAT ON THE EARS

We specialise in developing on-wall loudspeakers.

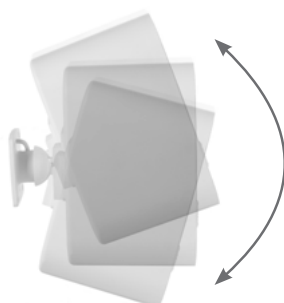

Nothing bombastic - just power with style. From eye-catching designs for contemporary interiors to timeless classics that feel at home in any space, our speakers deliver excellent sound quality at an affordable price.

UNIVERSALS

PERFECT SOUND. ANY SPACE. EVERY STYLE.

Meet the Universals. A sleek front panel combined with softly rounded edges creates a timeless, all-round design. Their unique bracket allows flexible alignment, so they blend seamlessly into any interior. Inside, patented drivers deliver exceptional performance for every musical taste. In short: universal versatility, crafted with precision.

- ball and socket joint
- plug-in screw adaptor
- universal design
- horizontal and vertical mounting

OUTDOOR SPEAKERS

DESIGNED FOR THE ELEMENTS.

Our outdoor speakers combine smart design with exceptional sound. Thanks to their clever shape, they deliver performance that stands out in any setting. Each model is crafted in a specific size and tuned to create its own distinctive voice. Built to withstand the elements without compromising on audio quality, they bring music to life outdoors, season after season.

MULTIROOM

EVERY ROOM. EVERY BEAT.

Music is the heartbeat of our lives and our homes. At ArtSound, we create solutions that fit every musical taste and every genre. From a discreet box for your favourite radio station, to a simple volume control on the wall, to a device that manages six pairs of speakers, or even a fully integrated multiroom system... With us, sound reigns supreme.

ArtSound multiroom products* offer all the latest ways to listen to music: from listening to internet radio to streaming your favorite music service. Connecting peripherals is child's play thanks to the extensive connectivity options.

*Functionality depending on model

SMART HPRO525 active multiroom inwall speaker

power	60 W
Ø x d	20 x 8,9 cm
inputs	line-in
outputs	speaker out
streaming protocol	Spotify Connect, AirPlay 2, DLNA, UPnP, Qplay
units / box	1

SMART IN SINGLE active multiroom inwall speaker

power	60 W
Ø x d	23,5 x 10,8 cm
inputs	stereo RCA, optical, microUSB (DAC), USB (mass storage)
outputs	stereo RCA + subwoofer
streaming protocol	Spotify Connect, AirPlay 2, DLNA, UPnP, Qplay
units / box	1

SMART IN SET active multiroom inwall speaker

power	2 x 60 W
Ø x d	23,5 x 10,8 cm
inputs	stereo RCA, optical, microUSB (DAC), USB (mass storage)
outputs	stereo RCA + subwoofer
streaming protocol	Spotify Connect, AirPlay 2, DLNA, UPnP, Qplay
units / box	2

Our professional-grade products share the same DNA as all our solutions: they are not only highly functional, but exceptionally durable. Designed to withstand intensive use - often 24/7 - they perform reliably in even the most demanding conditions.

Whether in a vast assembly hall of an automotive factory, a cold storage facility in a meat processing plant, a small dental practice, or a multi-wing hospital, our products consistently deliver. From background music and public announcements to critical evacuation alarms, they simply work. Reliability is essential - and with us, it is guaranteed.

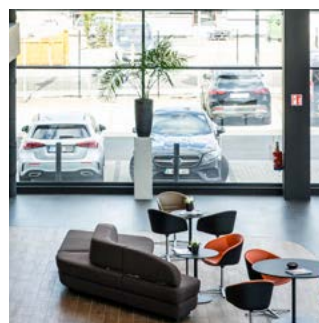

Beyond the products themselves, we provide comprehensive support throughout every phase of a sound system project. From initial planning and on-site visits to hands-on assistance during commissioning, we are there every step of the way.

AMPLIFIERS

Our professional audio amplifiers are engineered to deliver reliable, high-performance sound in any application. Designed for continuous operation and demanding environments, they combine power, efficiency, and durability. Whether for fixed installations or mobile setups, our amplifiers provide the solid foundation every professional sound system requires.

ArtSound amplifiers are the beating heart behind our speakers. There are three categories:

Preamplifiers take the different input signals from various sources and make them equally loud.

Power amplifiers take this sound signal and make it loud enough to drive the connected speakers.

Mixing amplifiers can receive various input sources, adjust their volume, and output the signal to the connected speakers.

MX60MKII mixing amplifier

h x w x d	6,3 x 21,5 x 28,5 cm
output power 100 V - 8 Ω	60 W

h x w x d	19"/ 2U - 8,8 x 48,4 x 40,5 cm
output power 100 V - 8 Ω	2 x 240 W (2 zones)
optional accessories	BT wall panel selective broadcast microphone

MAT-8000 matrix

h x w x d	19"/ 3U - 13,2 x 48,4 x 42,5 cm
optional accessories	BT wall panel
	selective broadcast microphone

PRH-4240 power amplifier

h x w x d	19"/ 1U - 4,4 x 48,4 x 42 cm
output power 100 V - 8 Ω	4 x 240 W
channels	4

PRH-4350 power amplifier

h x w x d	19"/ 1U - 4,4 x 48,4 x 42 cm
output power 100 V - 8 Ω	4 x 350 W
channels	4

PRL-1502 power amplifier

h x w x d	19"/ 2U - 4,45 x 48,3 x 27,5 cm
output power	2 x 150 W (4 Ω) - 2 x 75 W (8 Ω)
bridge power	2 x 300 W
channels	2

PRL-1504 power amplifier

h x w x d	19"/ 2U - 4,45 x 48,3 x 27,5 cm
output power	4 x 150W (4 Ω) - 4 x 75W (8 Ω)
bridge power	2 x 300 W
channels	4

PRL4600 power amplifier

h x w x d	19"/ 1U - 4,45 x 48,3 x 32 cm
output power	4 x 800 W (4 Ω) - 4 x 600 W (8 Ω)
bridge power	2 x 1600 W (4 Ω) - 2 x 1200 W (8 Ω)
channels	4

PRL-3002 power amplifier

h x w x d	19"/1U - 4,45 x 48,3 x 27,5 cm
output power	2 x 300 W (8 Ω)
channels	2

AMP850 power amplifier

h x w x d	8,8 x 43 x 33,5 cm
output power	8 x 50 W (8 Ω)
bridge power	2 x 150 W (4 Ω)
channels	8

RADIOS

YOUR RADIO. ALWAYS BY YOUR SIDE.

From childhood road trips to busy mornings before work. Always there in the background when out shopping or having a bite in the hospital restaurant, radio moves with you through every stage of life. At ArtSound, we create radios that match every mood: subtle when needed, powerful when desired. Your radio is your connection to the world.

ACCESSORIES

control system

The control panels give local access to the most important features of the compatible amplifiers or can connect a local audio input source.

microphones

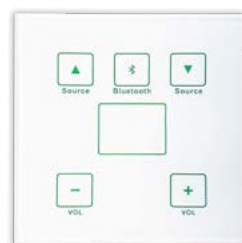

Our range of microphones consists of single microphones and selective paging microphones compatible with specific models.

signal converters

In the various set-ups, it is sometimes necessary to convert a signal to another structure. This makes it possible to allow two devices to flawlessly communicate with each other, or to convert a low-ohm speaker to a 100V version.

music sources

From internet radio to cd-players, every system needs a reliable music source. Sound mixers are essential to send the right music to the right zone, at the correct volume.

WP-8000C

h x w x d	8,6 x 8,6 x 3,3 cm
in-wall housing	7,5 x 7,5 x 4,5 cm

Don't take our word for it. Let us convince you by making an appointment to visit our ArtSound showroom to see and hear our products live.

Centrally located in Gavere (Belgium), close to Ghent, we can offer you advice, some lame jokes from one of our experienced team members, and a cup of coffee.

Fully equipped, acoustically treated, and always a relaxing atmosphere.

Please make an appointment.

We won't bite. We speak sound.
